

AUSTRALIAN PREMIUM QUALITY BEEF AND LAMB

From the lush pastures of the Central Tablelands NSW

WELCOME

A standout feature of “H Farm” is the farm’s superb location. Situated in the highly regarded Central Tablelands district of NSW, Australia, renowned for its high rainfall, productivity and pastures.

At H Farm we specialise in pure Black Angus beef cattle and first and second cross Prime Lambs. We bring you the highest quality, best tasting, consistently tender and delicious meat, every time.

Our aim is to give full transparency on the ‘Paddock to Plate’ journey of all our products, giving peace of mind on how your meat was produced.

OUR FARM

H Farm is a large-scale property in the highly sought after Central West area, bounded by picturesque vistas, high quality pastures, abundant water and excellent access. H Farm is an exceptional property, blending productivity with a well-earned reputation for producing high quality livestock, both sheep and cattle, as well as fantastic fodder.

H Farm is used for both sheep and Black Angus cattle breeding, as well as a finishing block. Its location, quality and type of soil and pastures lend itself to all the enterprises. The infrastructure in place also allows for sheep and cattle to be run efficiently and effectively.

“We are passionate about producing superior, Australian, 100% grass fed, beef and lamb, ethically raised on our own pristine pasture.”

CATTLE

H Farm is a respected premium beef producer in the Central West Tablelands, NSW Australia.

We have distinguished ourselves as producing exceptional beef. We are synonym with premium Black Angus beef in both domestic and export markets. We specialise in Black Angus breeds to bring you the highest quality beef.

Our cattle are free range and 100% grass fed from our pristine pastures, resulting in beef of the highest possible quality - the ultimate taste of Australia.

“We take pride in being able to deliver premium quality beef and lamb from the animals we rear on our very own paddocks.”

SHEEP

Our lamb is sourced directly from our farm, so we have complete control over its provenance and can guarantee its quality. Our customers deserve to know exactly where their food comes from and how it was raised.

At H Farm, we understand that our customers are increasingly concerned with the sustainability of their food choices, and we are proud to play our part in promoting sustainable and responsible farming.

“Stress free, content and respectfully managed stock makes for a premium quality end product.”

PASTURE

The Pastures at H Farm are world class performance pastures. They are temperate perennials including phalaris, cocksfoot and clover based, but we have areas of ryegrass and fescue, along with other annual grasses.

The elevation of H Farm, roughly 950 metres above sea level, makes it a higher altitude area for grazing healthy beef and lamb. We have quite mild summers, which suits these pastures well and can extend our spring growth well into summer.

The majority of the pastures are established pastures, which are extremely productive. At H Farm we have a regenerative farming plan in practice, and focus on pastures, soil health, improving biodiversity and implementing a holistic planned grazing.

*“100% grass fed beef
and lamb from our high
altitude, pristine pastures.”*

FRESH WATER

H Farm is perfectly positioned in the high altitude water catchment area of the Lachlan and Macquarie Rivers.

We have several large, clean and well placed dams for water storage, the cattle and sheep are naturally drawn to them.

There is an abundance of native bird life that are also attracted to the water sources on the property, emphasising the health of the natural environment.

H Farm also includes a fully reticulated watering system supplying storage/header tanks, which are all inter-linked supplying stock troughs, the wool shed and the stock handling facility.

Studies have shown that stock productivity increases up to 20%, based purely on the constant availability of fresh, clean drinking water.

RAINFALL

Abundant rainfall is so important to every aspect of life at the farm. The average rainfall for this location in the Central Ranges of Australia is in the range of 800-850mm per annum.

“Our farm has an abundance of clean water sources readily available for our stock, backed up by being in a high annual rainfall area.”

NATURAL SHELTER

The property is enhanced by abundant natural timber comprising principally of yellow box trees with some peppermint red gum on the lower slopes.

Several shelter belts of both native and introduced species have been established to provide stock shade and shelter.

Providing plenty of shelter enables cattle and sheep to shade from direct sun, reducing the extra heat load they take on by up to 50 per cent.

Heat stress and exhaustion should not occur if cattle are able to find shade and rest during the hottest part of the day.

In winter the stock will gather together along the tree lanes and stand together to protect each other from any cold winds or icy temperatures.

“At H Farm animal health and comfort is our highest priority.”

ANIMAL HEALTH

At H Farm animal health is our highest priority. Cattle and sheep under our direct care are treated with dignity, respect and are handled in such a way as to meet and exceed all relevant Australian Animal Welfare Standards.

All cattle and sheep are grown in industry approved best practice for all our livestock management.

At H Farm we pride ourselves on the natural health and safety of our stock. All staff are fully trained in animal husbandry, not only

to ensure the humane treatment of our stock, but to also employ strict quarantine measures so our stock remain disease free and 100% healthy.

“We are committed to growing quality, healthy premium meat for our customers, while also being fully transparent about where it comes from and how it is ethically produced.”

*“Quality, Australian red
meat that delivers the
ultimate eating experience.”*

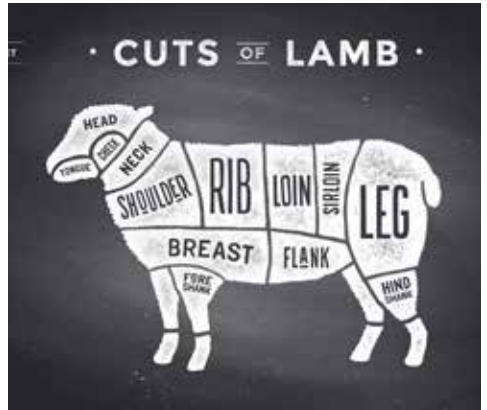

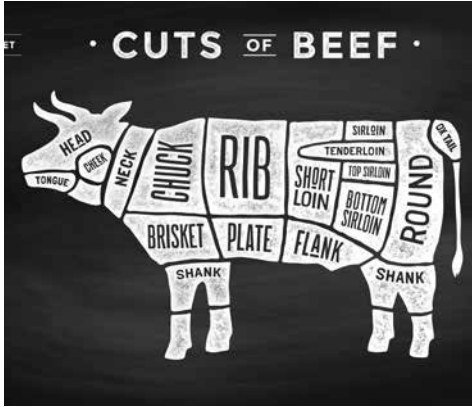

PREMIUM BEEF AND LAMB

H Farm is an industry leader in breeding and raising 100% grass fed, premium Black Angus beef and Prime Lamb for our consumers.

The secret to our premium quality, tender and flavoured beef and lamb lies in the environment from which it comes. In the high altitude of the Central Tablelands of New South Wales, Australia, where we are blessed with rich and fertile land, reliable rainfall and a crisp clean climate.

Here our cattle and sheep are raised sustainably across large spanning acreage - stress free, clean and green.

This region is well renowned for its food and wine, and our cattle and sheep are both the product and benefactors of such natural bounty. Nourished by the distinctive produce of our own paddocks on H Farm, delivering incredible richness which imparts a unique taste as deep as it's valleys and as high as it's plains - a taste as rich as the Central Tableland's region itself.

“We are the experts when it comes to producing the best beef and lamb. All you need to do is enjoy the premium products of our labour.”
